## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

2. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- I. In claim 1, each of the species listed for R<sup>1</sup>.

In addition, if "a radical of general Formula II" is elected, then a species for each of R<sup>2</sup> and R<sup>3</sup> must also be elected.

- II. In claim 12, one SEQ ID NO that corresponds to each one of the delta-6 desaturase, the delta-6 elongase, and the delta-5 desaturase must be elected. Therefore, three SEQ ID NO must be elected, and it is requested that applicant identify which enzyme each SEQ ID NO corresponds to.

- III. In claim 14, one additional biosynthetic gene must be elected from those listed.

Art Unit: 1638

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

3. The claims are deemed to correspond to the species listed above in the following manner:

Claims 2-4 require that a radical of general Formula II is elected for R<sup>1</sup>.

Claim 12 requires that three SEQ ID NO are elected to correspond one to each of the three enzymes required.

Claim 14 requires that one additional biosynthetic gene is elected.

The following claim(s) are generic: Claims 1, 5-11, 13 and 15-20.

4. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the claims are drawn to producing modified fatty acids in a plant by transforming the plant with genes involved in the fatty acid biosynthetic pathway, as noted at page 3 of the specification.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and the requirement for different searches, restriction for examination purposes as indicated is proper.

Art Unit: 1638

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
